PROFILE

Hello there! My name is Dhananjay Chavan, and I am a Computer Science student with a strong passion for all things related to technology. I have always been fascinated by the power of computers and their ability to transform our world. I am particularly interested in web development, computer networks, cyber security and programming. My interest in these fields has driven me to constantly explore and learn more, always seeking to understand how everything works.

EDUCATION

Bachelor in Computer Science, Vishwakarma University. — Pune
Sep 2021 - Jul 2024

CERTIFICATION

JavaScript Essential Training. — LinkedIn Learning
Sep 2023

Node.js Essential Training. — LinkedIn Learning
Sep 2023

Building RESTful APIs with Node.js and Express. — LinkedIn Learning
Sep 2023

Java Object-Oriented Programming. — LinkedIn Learning
Sep 2023

PROJECTS

Online Ticket Booking System
The Wonderla Online Ticket Booking System is a full-stack web project enhancing theme park ticket booking. Customers can easily reserve tickets, select preferences. Admin can verify tickets via a secure panel displaying customer info. The technology stack includes **HTML**, **CSS**, **JavaScript**, **Node.js**, **Express.js**, and **MySQL**, ensuring stability.

Weather Application
The WeatherApp provides real-time weather data for a specific city, featuring temperature, humidity, wind speed, and more. I have used **HTML**, **CSS**, **JavaScript**, and **RapidAPI's Weather API** for this project. It delivers accurate updates, aiding users in making informed decisions.

Keylogger

This Python keylogger script, utilizing pynput and smtplib libraries, records keyboard inputs, periodically sending them via email. Ensure responsible and ethical use. Prerequisites include pynput, smtplib, sched, time, and threading. Customize sender and receiver email addresses, replacing placeholders. The script operates by monitoring, scheduling, and periodically emailing pressed keys.

E-Commerce Web Application

Developed e-commerce web app, enabling users to explore, order, and review diverse coffee products. Led front-end **HTML**, **CSS**, and **JavaScript**, and orchestrated back-end **Node.js** and **Express.js**, with **MySQL** for the database. Enhanced user experience with search, wishlist, and cart functionalities. Admin panel enabled efficient order management. Delivered seamless checkout and personalized dashboards for registered users. Expanded expertise in web development, user experience, and e-commerce platforms.

Portfolio Website.

My personal website serves as a dynamic showcase of my expertise and accomplishments into my technical proficiency and creativity. The site also offers a glimpse into my background and interests, allowing for a more personal connection. With a focus on simplicity and accessibility, it serves as a hub for potential collaborators and employers to learn more about my skills and capabilities. 🔗
